Job Description

- Sets up, adjusts, verifies programming, and operates CNC machines and tools.
- Sets ups and operates manual machines, such as mills, lathes, grinders, etc.
- Recognizes and reports process variations, tool offsets, dimensional and finish deviations, and assists with making corrective adjustments within procedure parameters.
- Operates multiple machines concurrently in order to maximize efficiency and effectively utilize resources.
- Maintains acceptable tolerances and surface finishes per drawing / instructions
- Verifies conformance of finished and in process work to specifications through the use of various inspection measuring equipment, including proficient use of, bore gages, ID and OD micrometers. Utilizes Optical Comparator to report variations in processes.
- Works under general supervision.
- Executes preventive maintenance on CNC and manual equipment.
- Maintains or exceeds production standards through efficient organization and planning. Follows and complies with all safety policies, procedures, and employee handbook. Accurately completes all required documentation.
- Meets attendance policy requirements.
- Contributes to team effort by assisting in areas as needed.
- Observe milling or planning machine operation and adjust controls to ensure conformance with specified tolerances.

Job Type: Full-time

Salary: \$15.00 to \$25.00 /hour

Application Questions

- How many years of CNC Machinist experience do you have?
- What is the highest level of education you have completed?
- Where do you see yourself in the future?
- What wage are you looking for?
- What measuring tools have you used? Do you know how to use a micrometer?
- What previous machines have you worked on?
- What machines have you programmed?
- Are you open to being trained on other machinery?
- What do you expect from a boss?
- Why do you want to be part of Grob?
